

AUTOSUFFISANCE

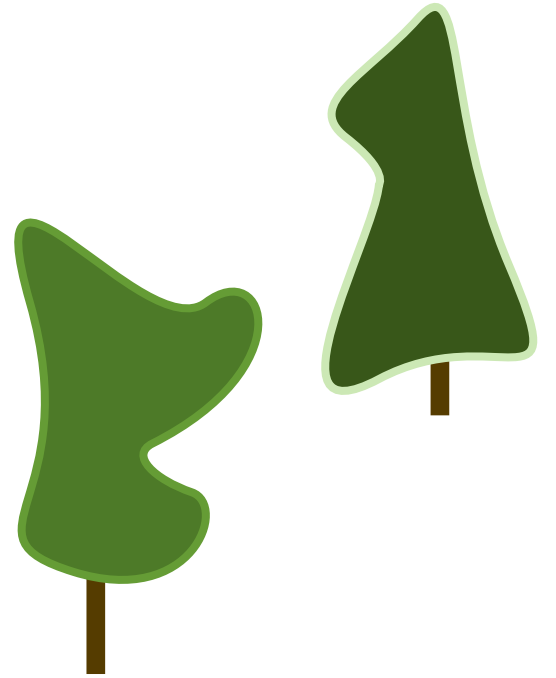

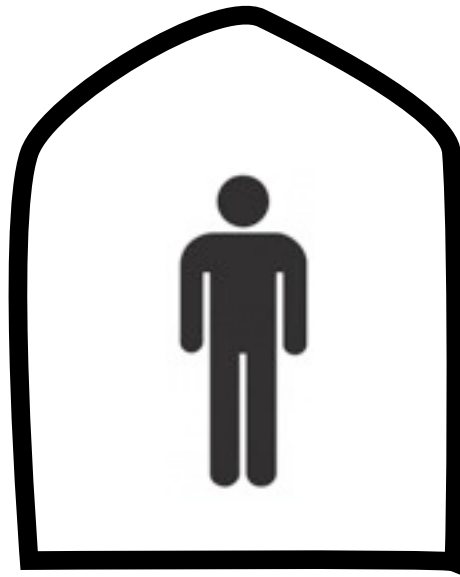

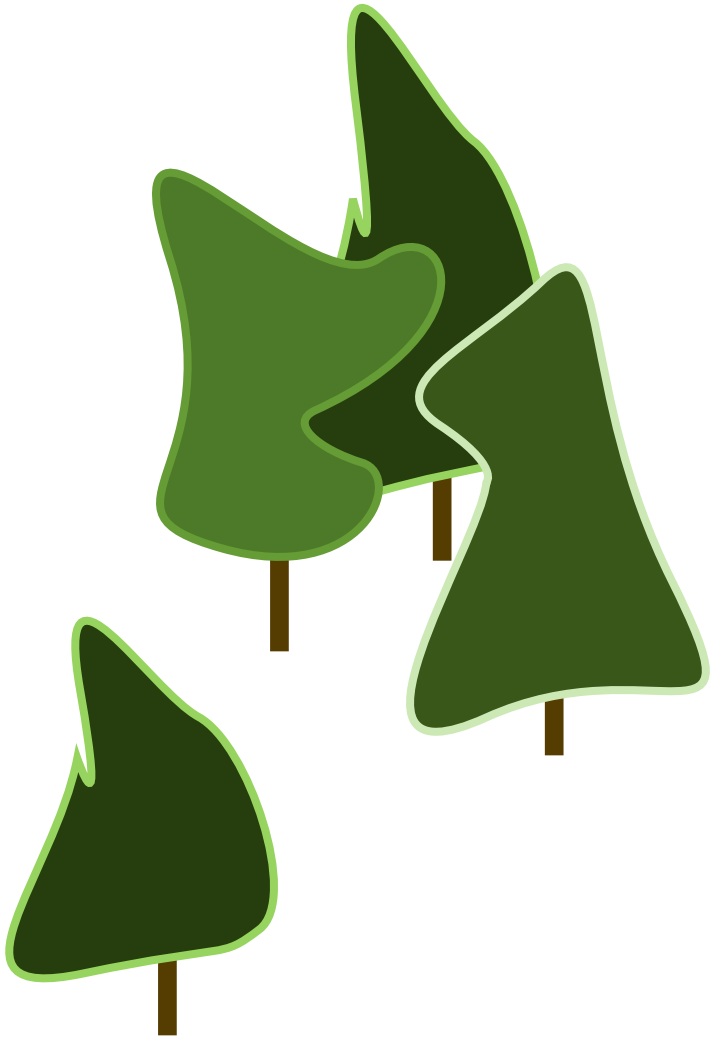

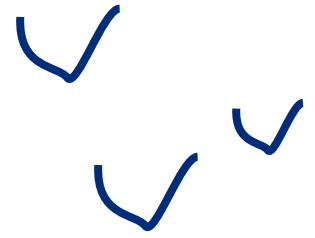

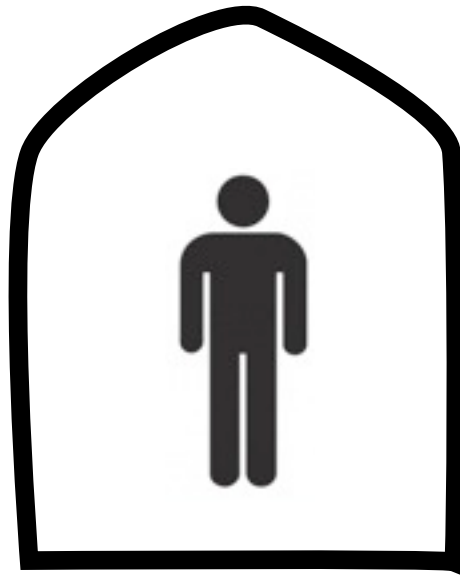

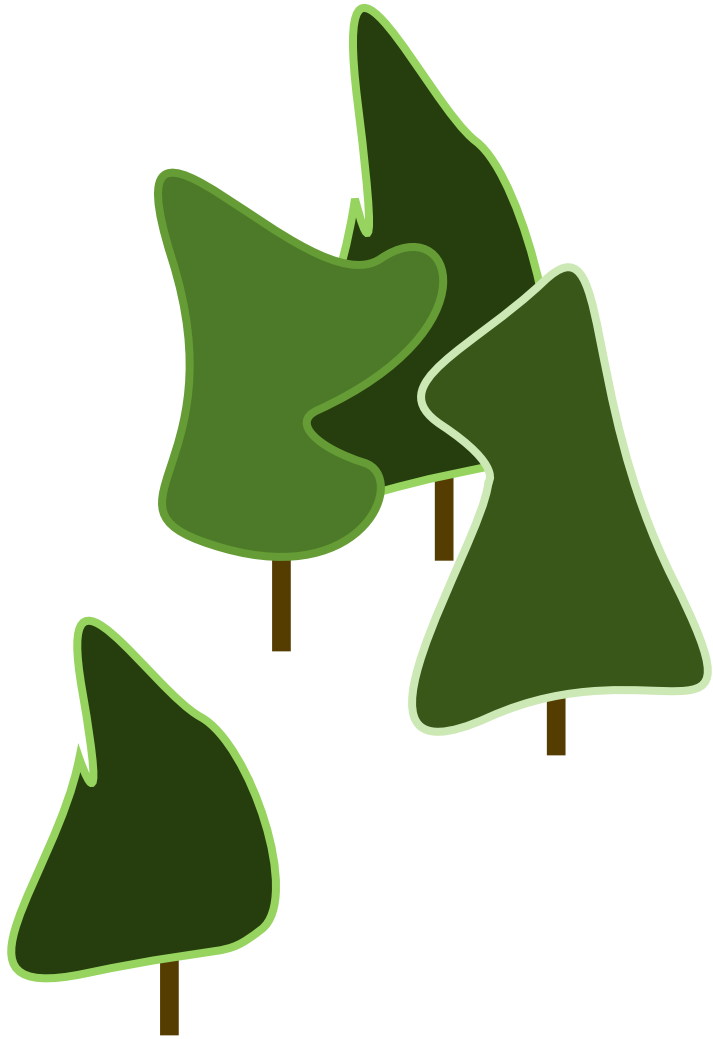

Un Homme en crise avec son milieu

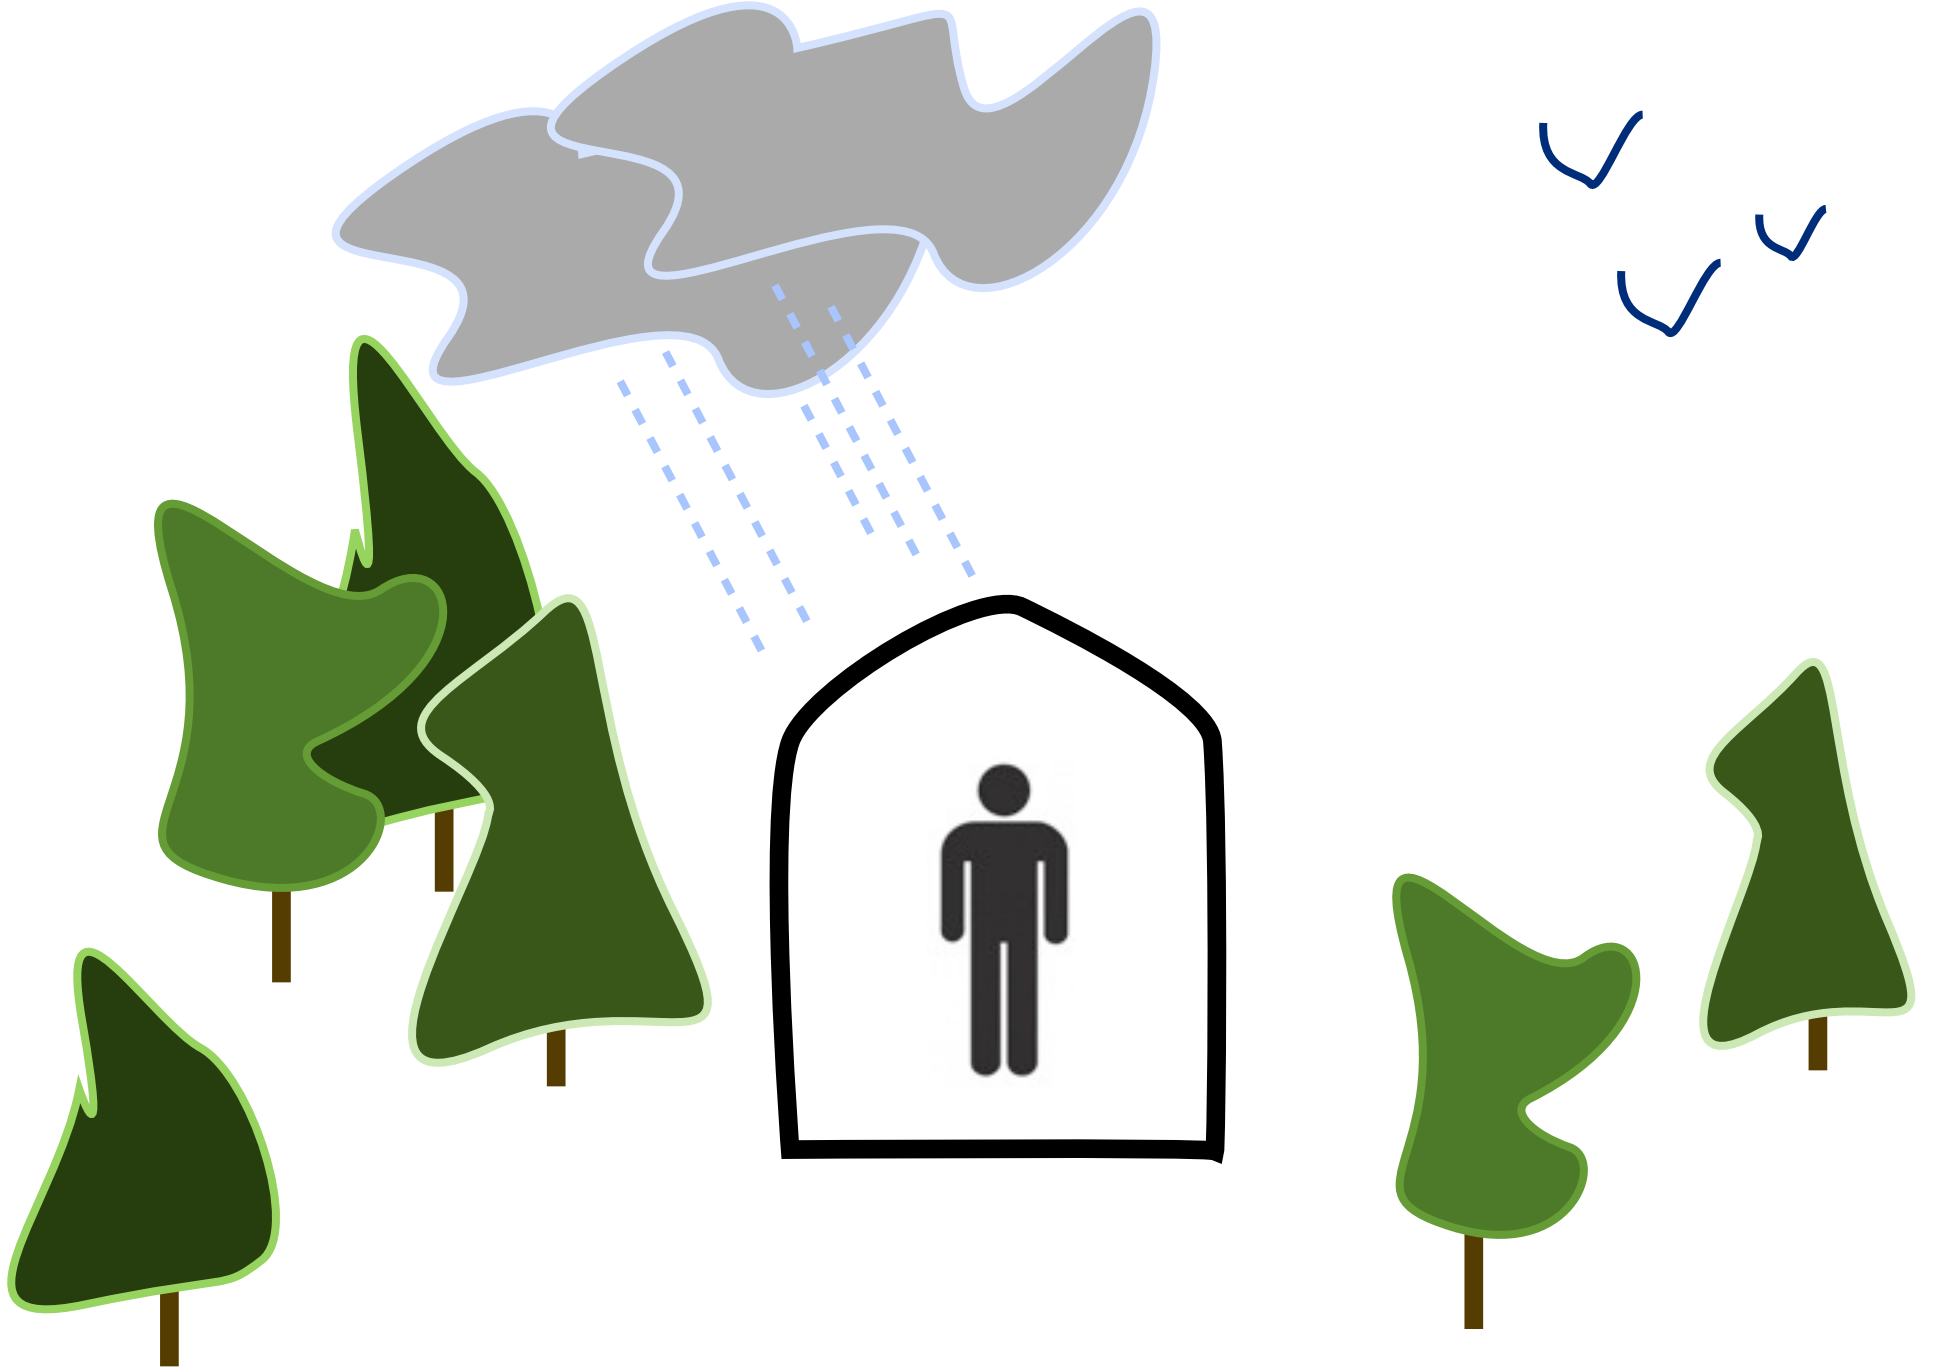

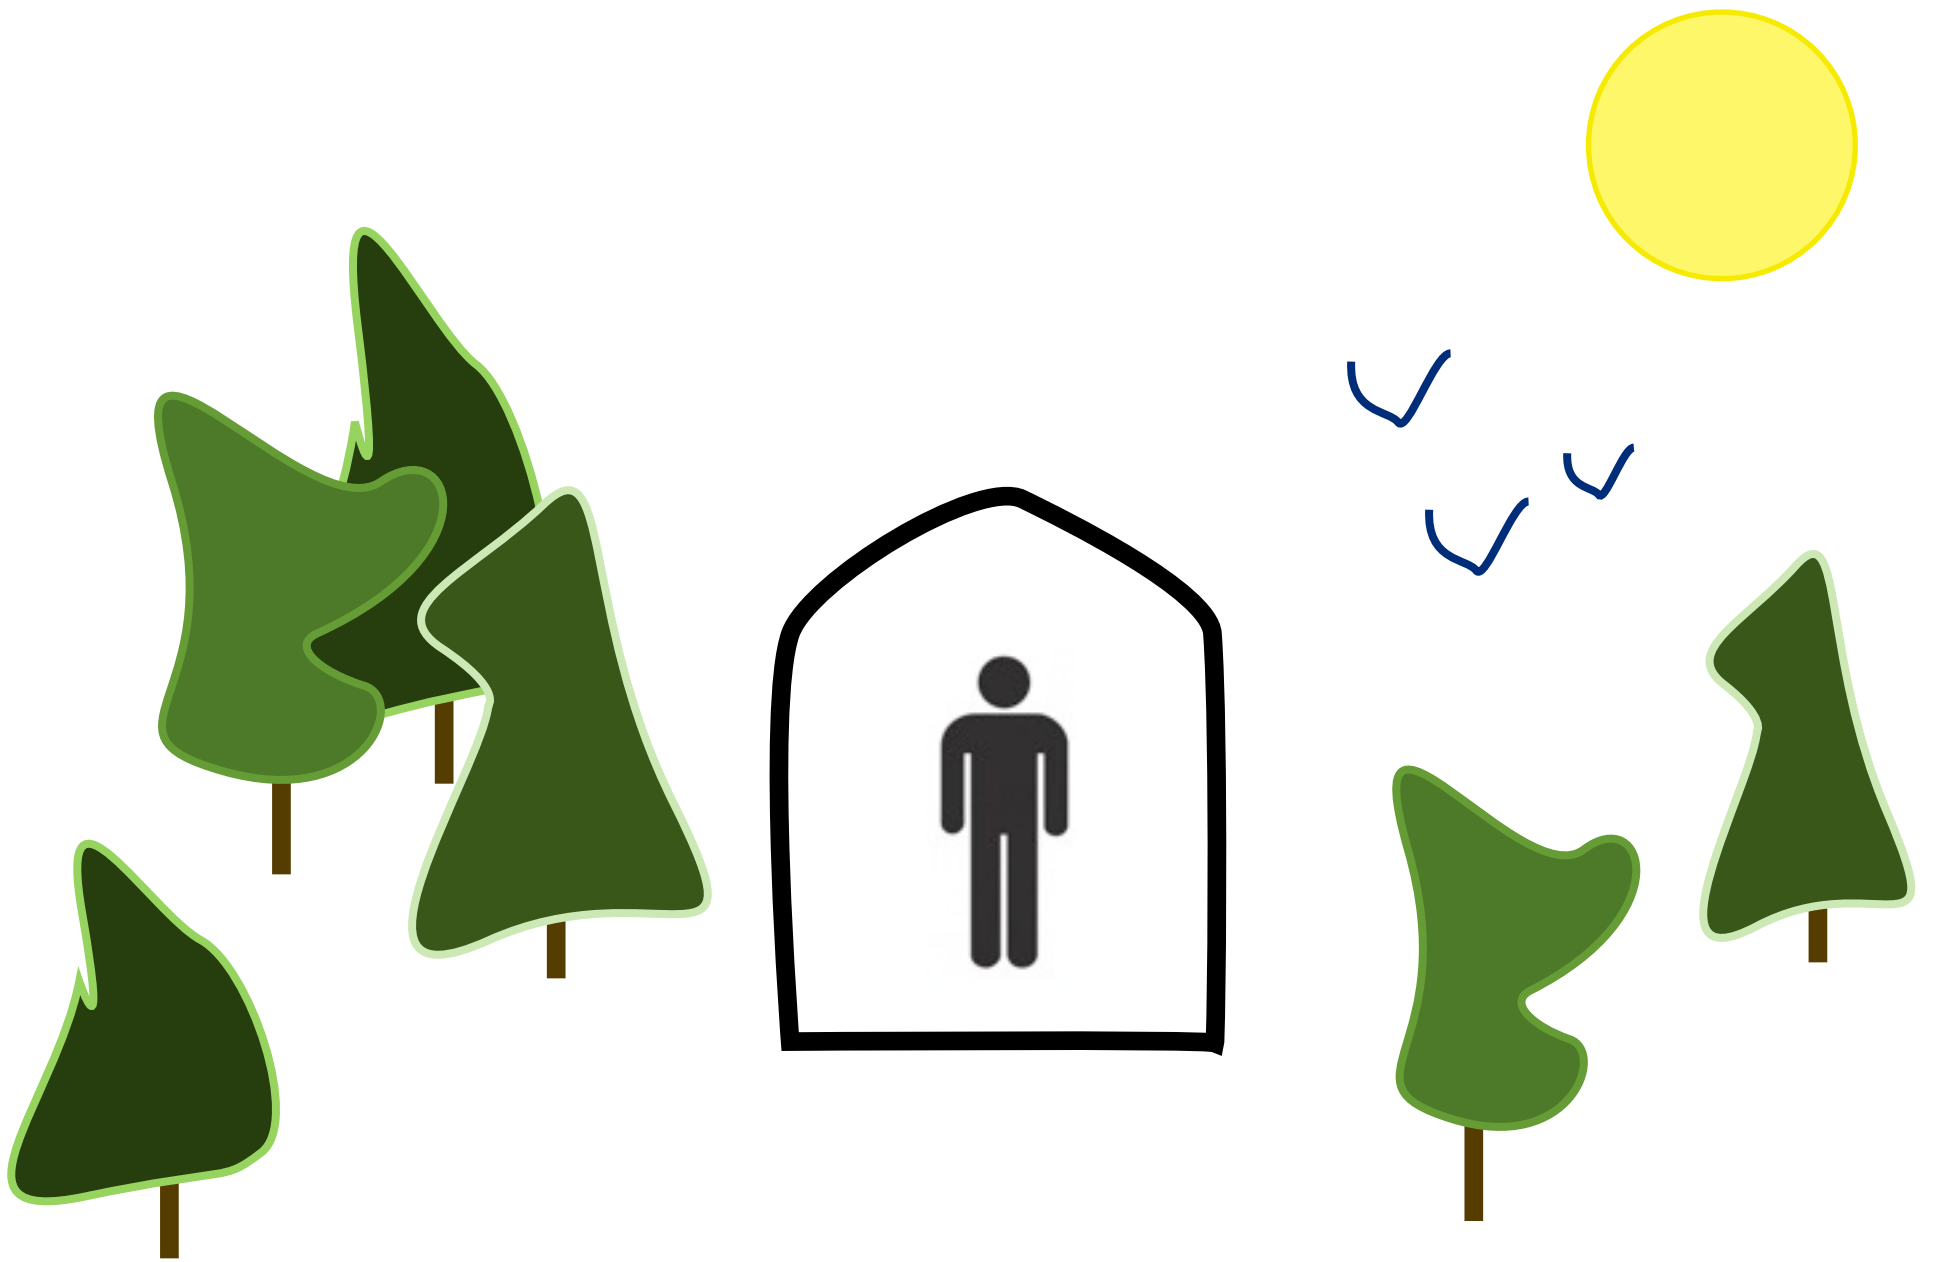

**Le collectif comme un écosystème,
produire de la localité et du dialogue.**

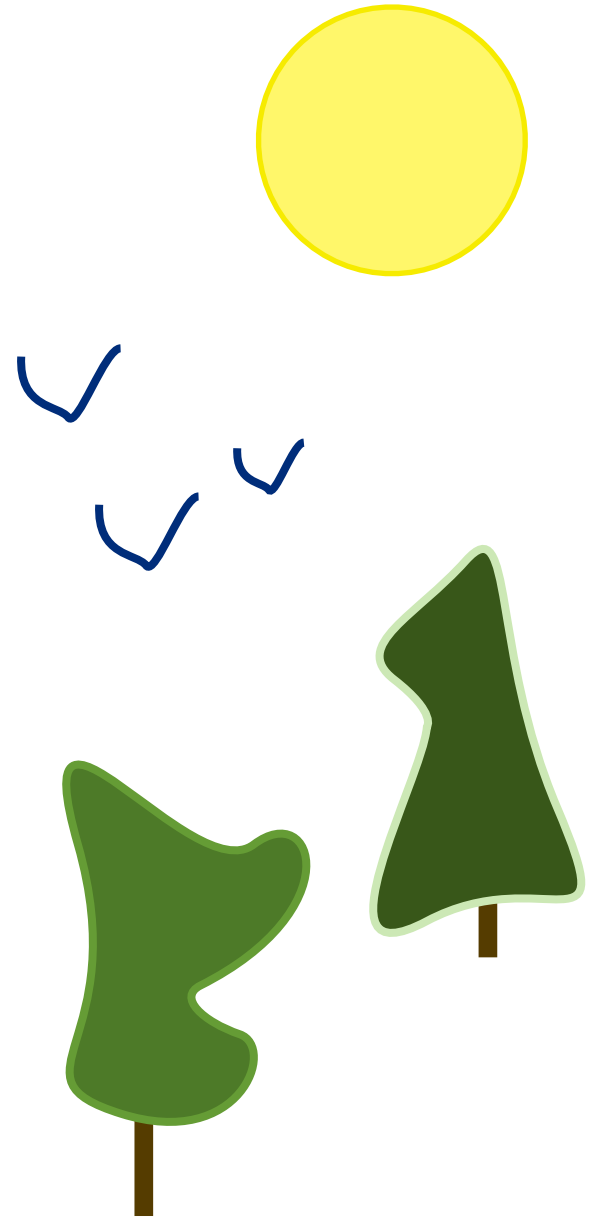

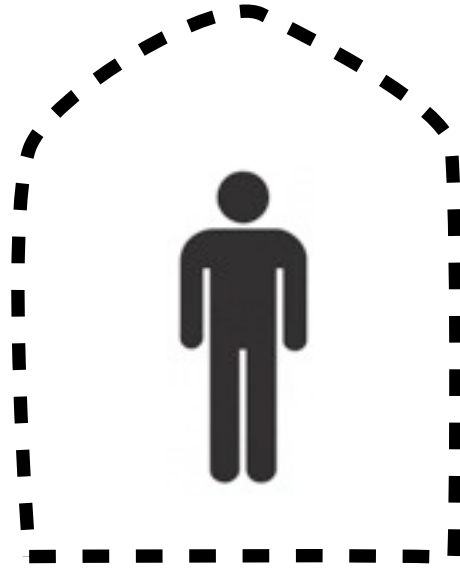

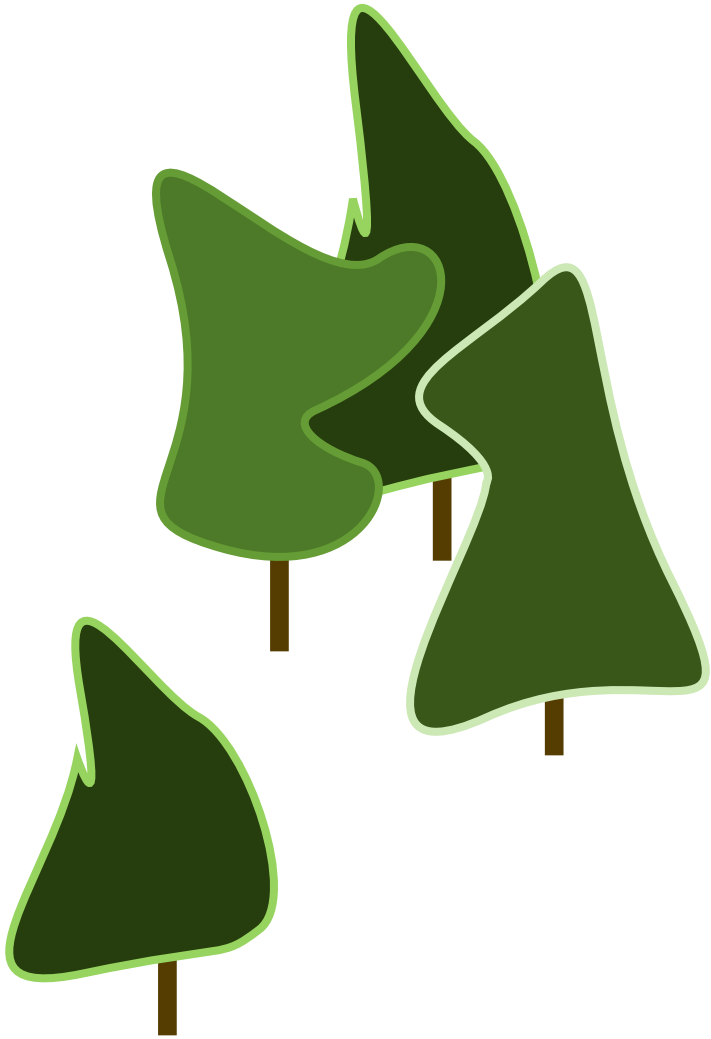

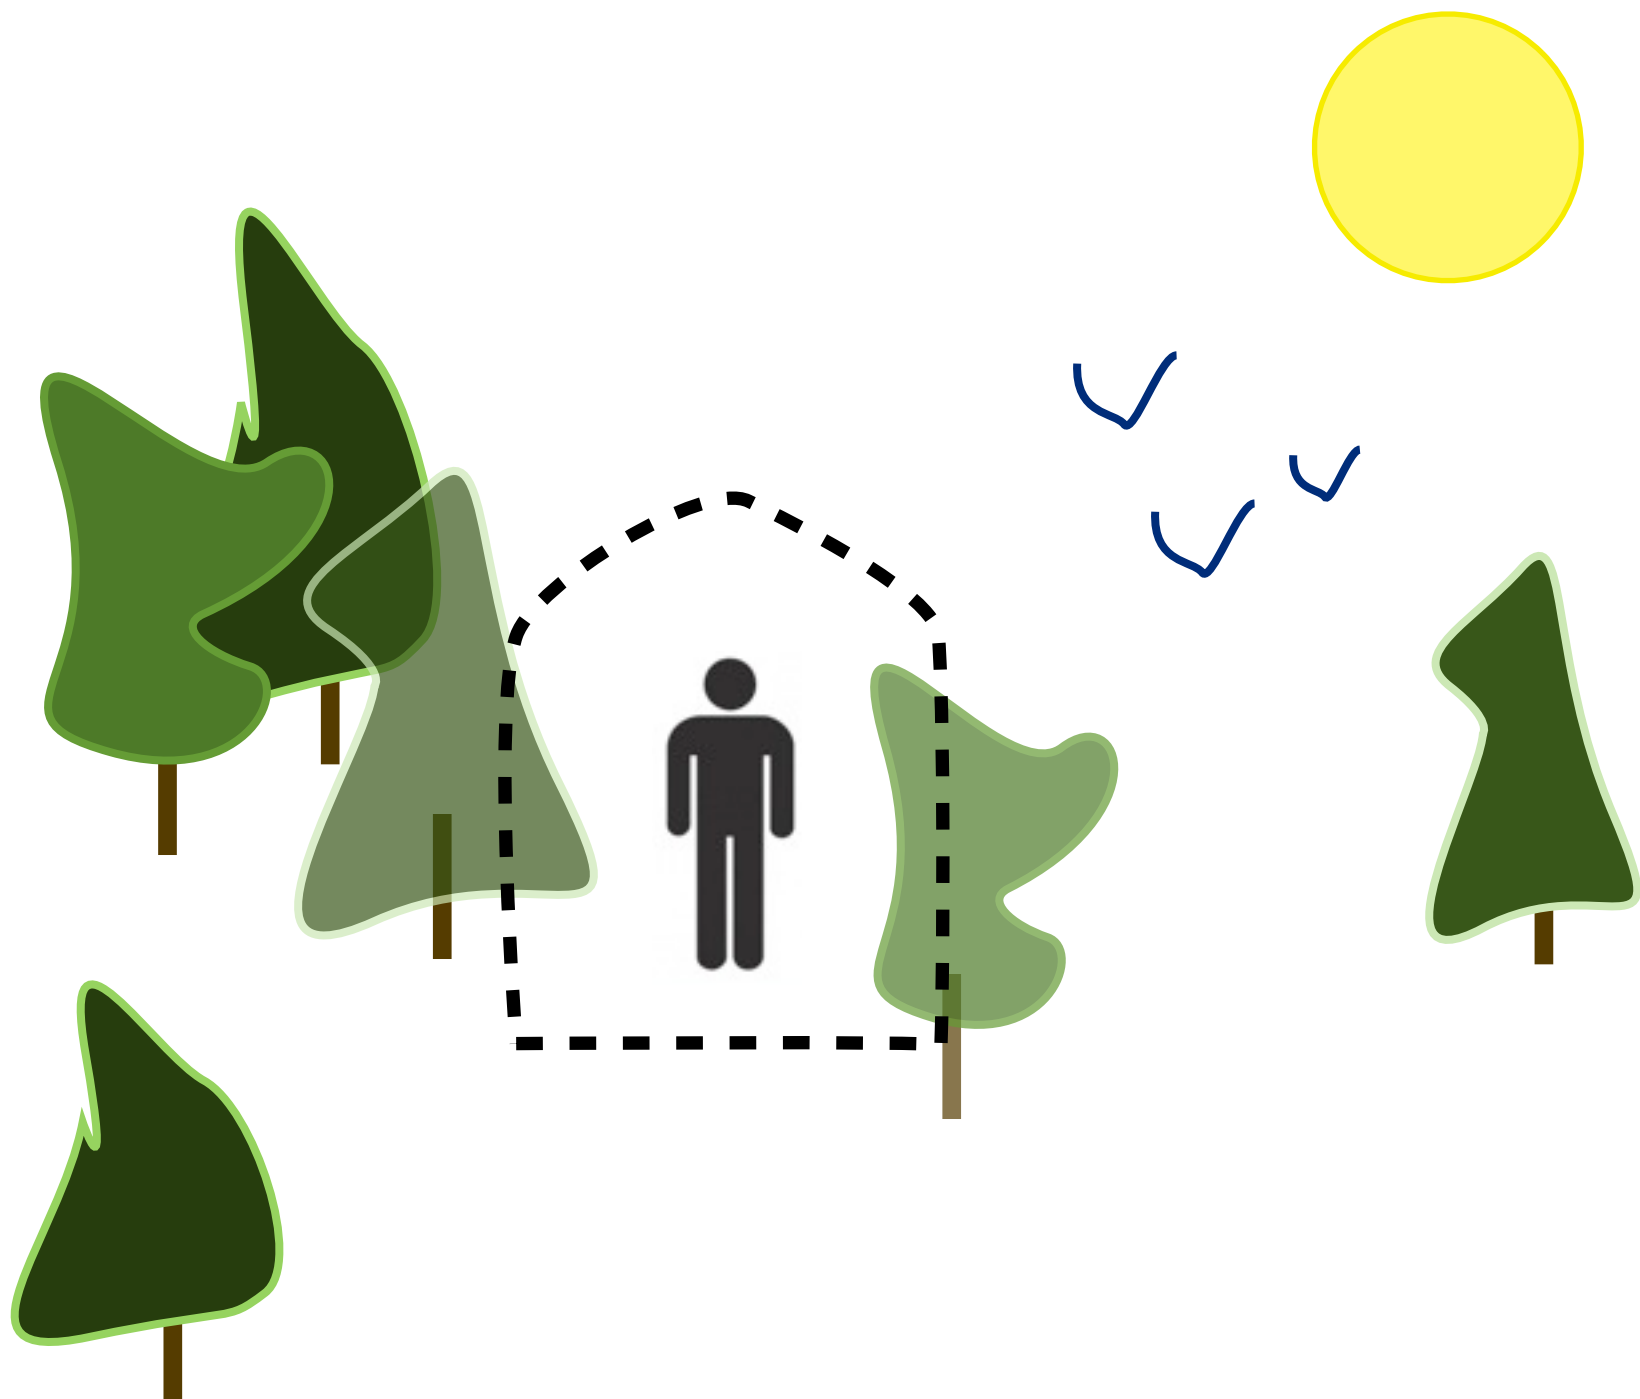

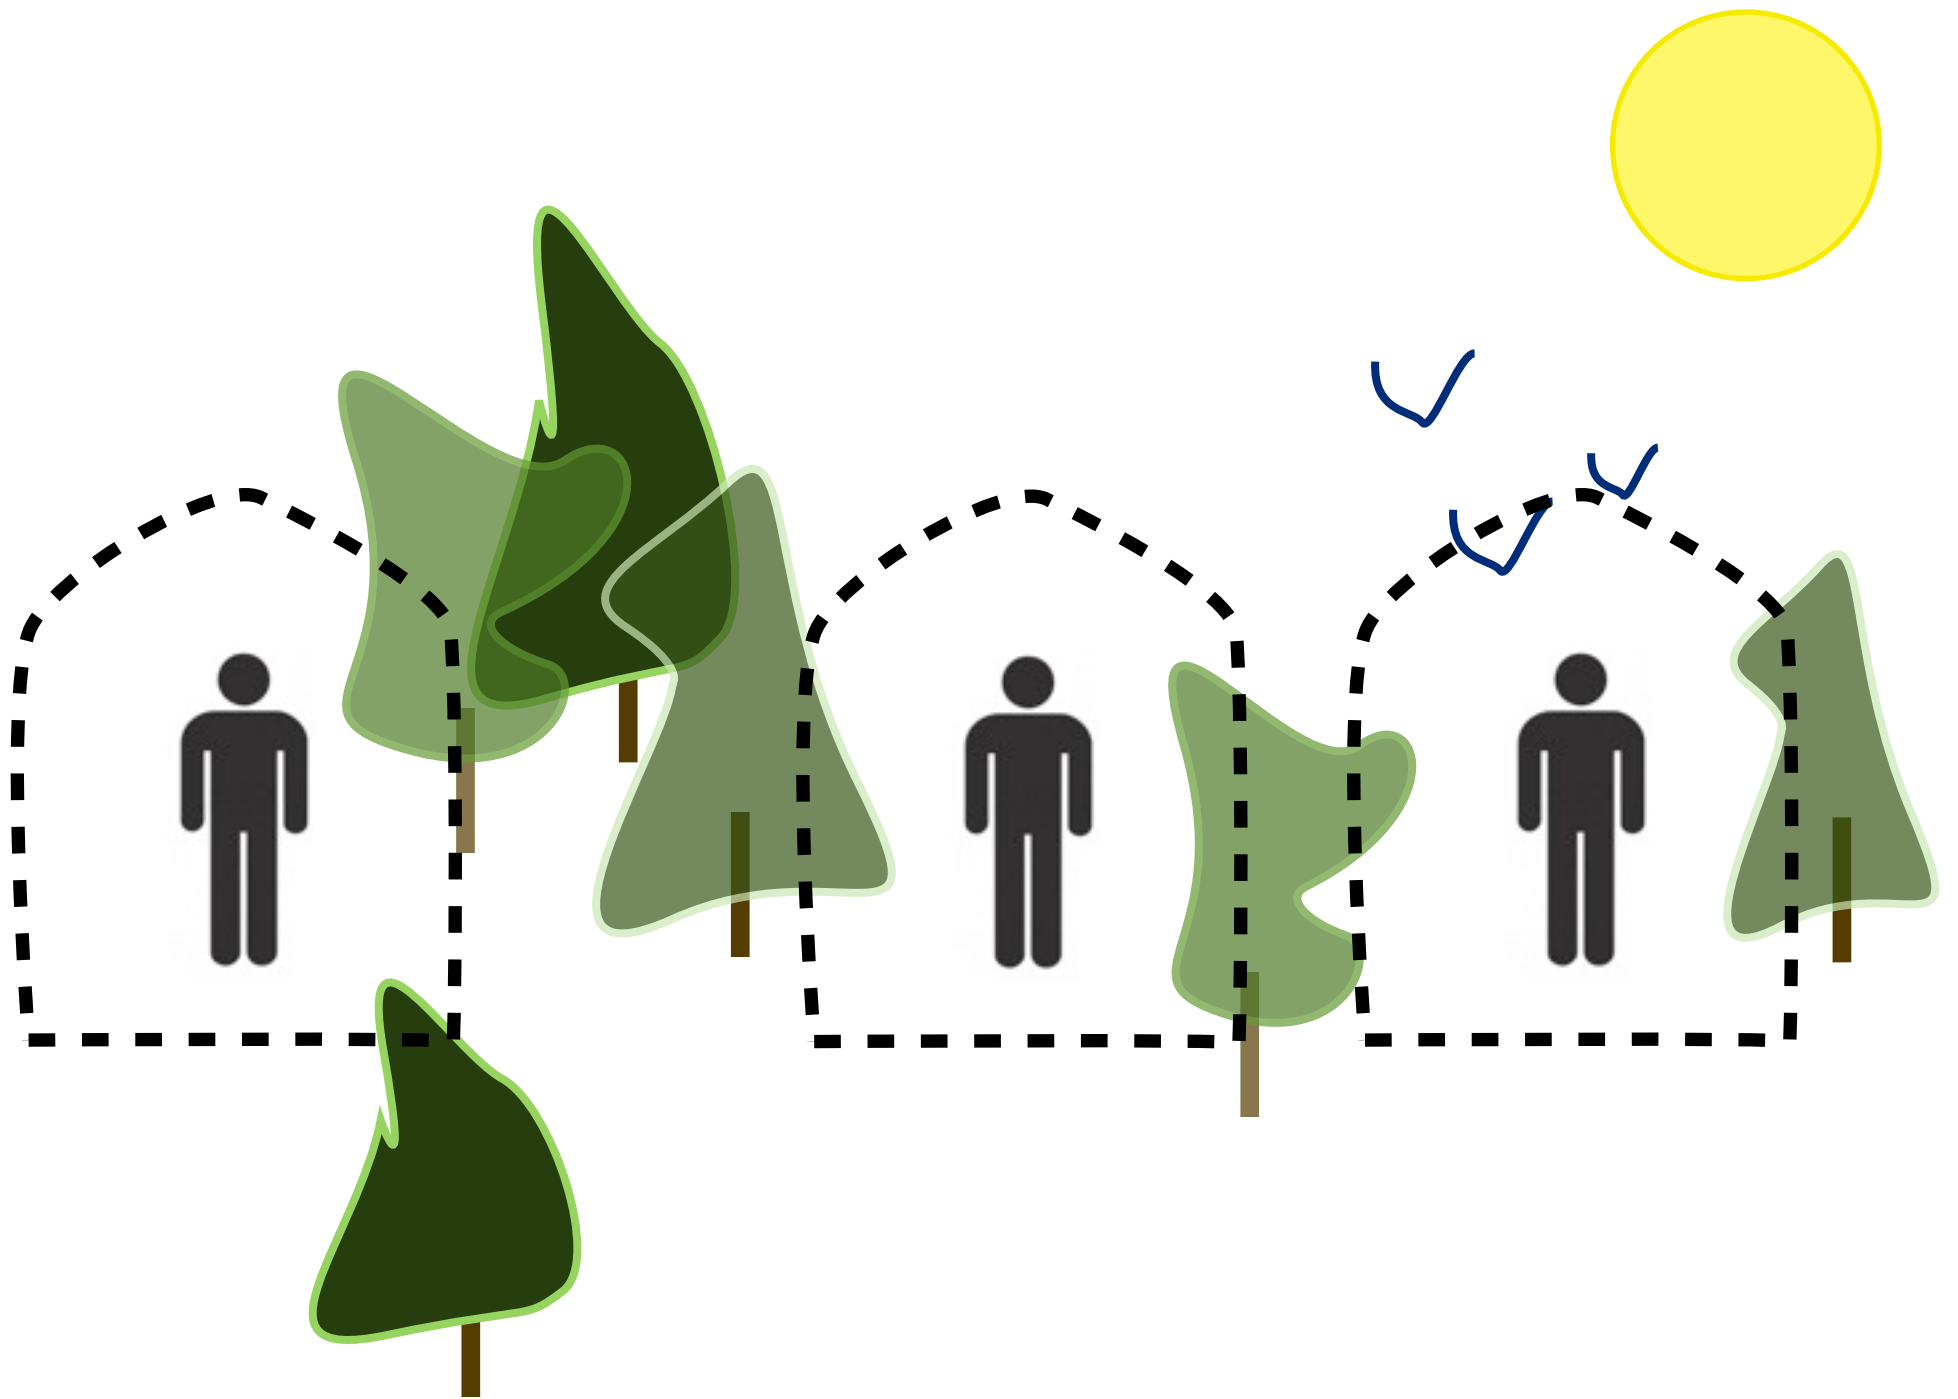

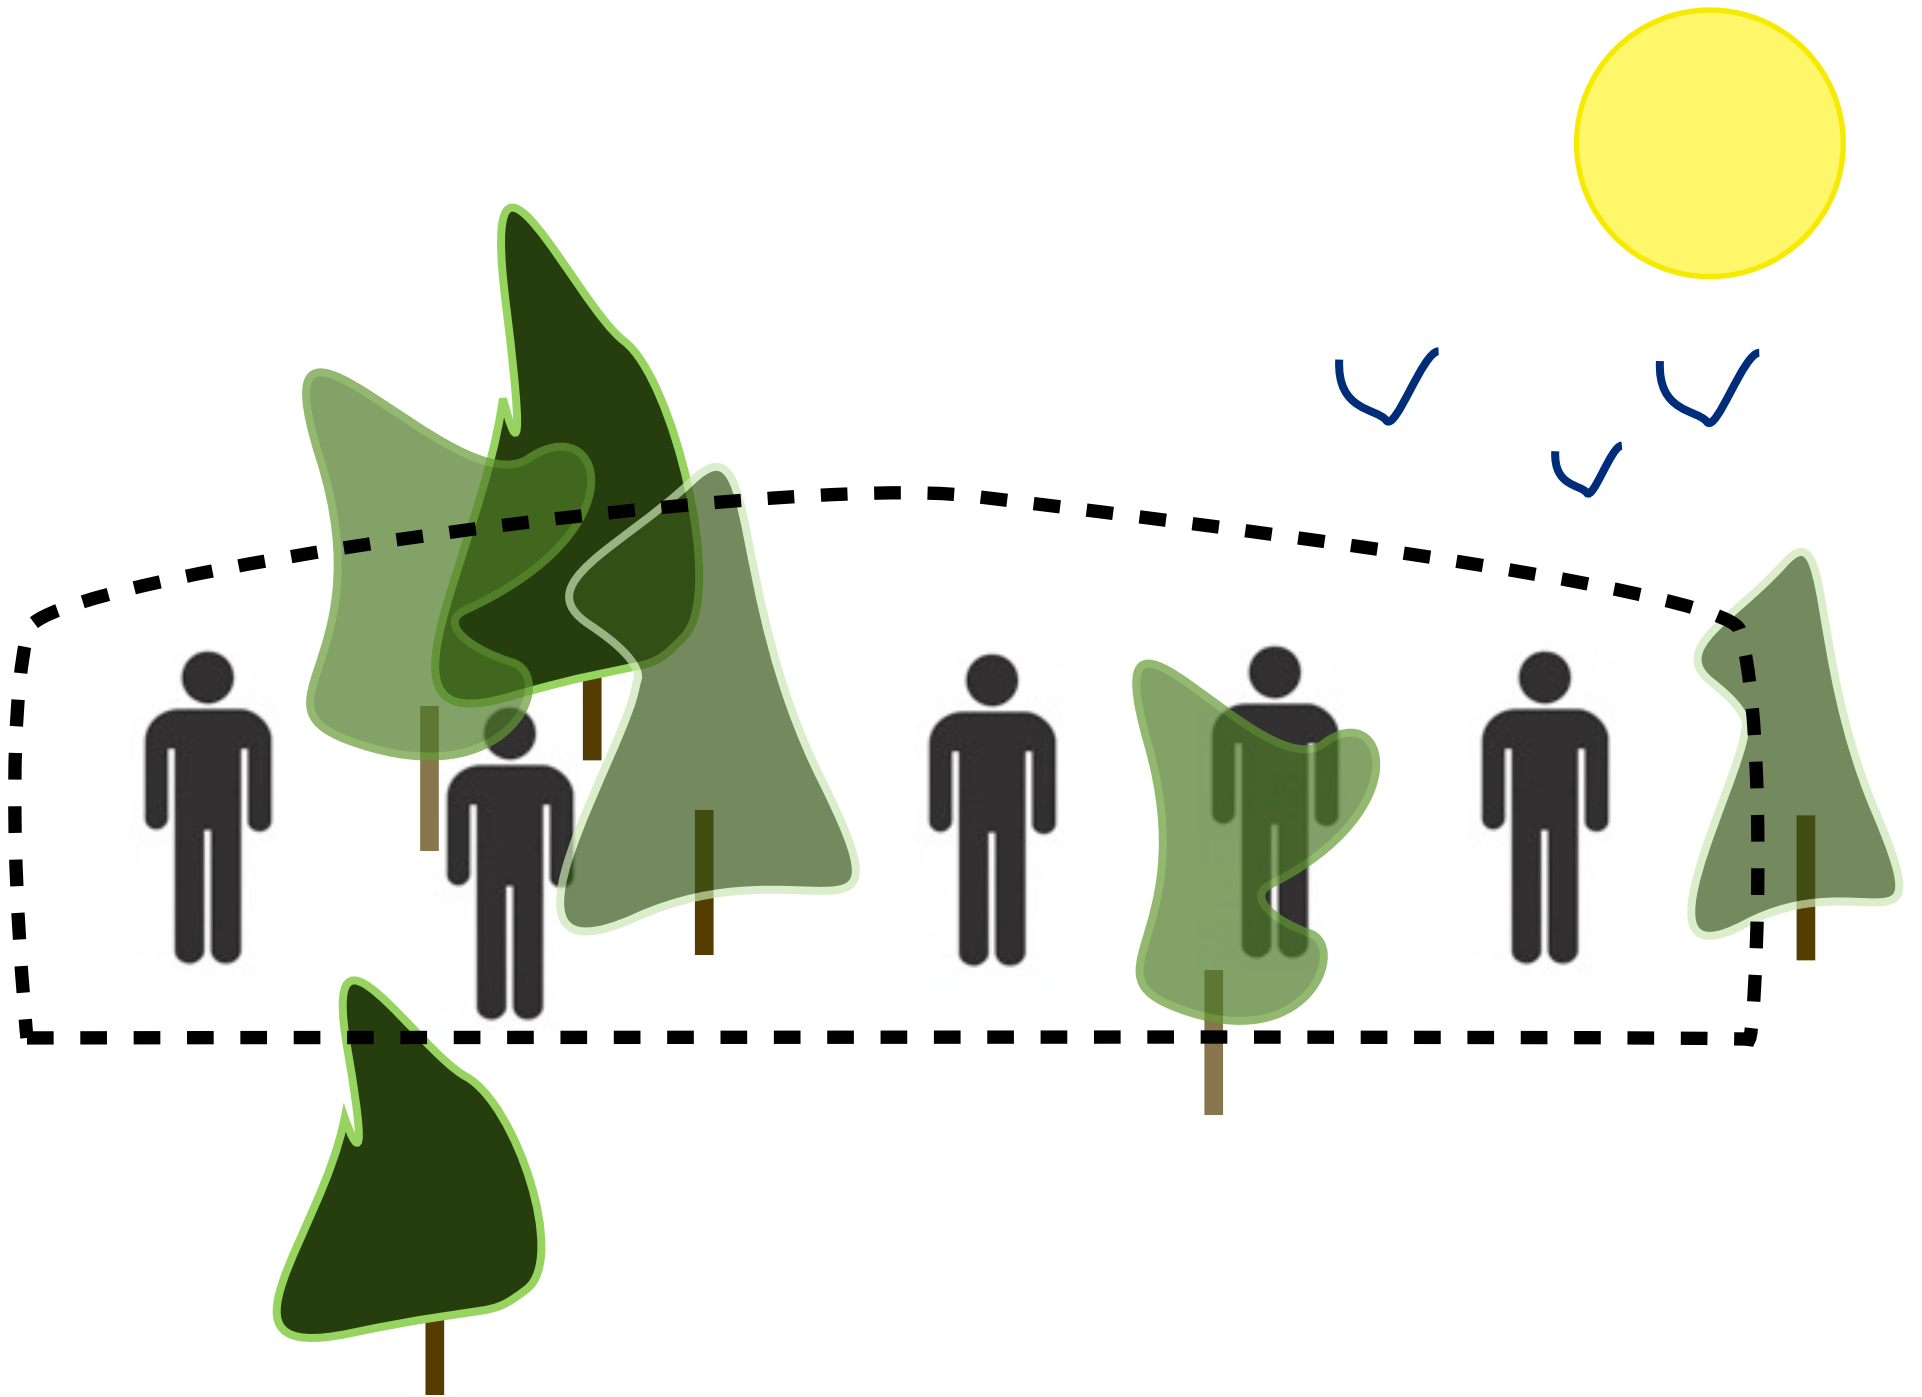

**La nature et l'homme,
deux éléments complémentaires.**

Nourriture: 300kg

75kg de fruit

75kg de légume

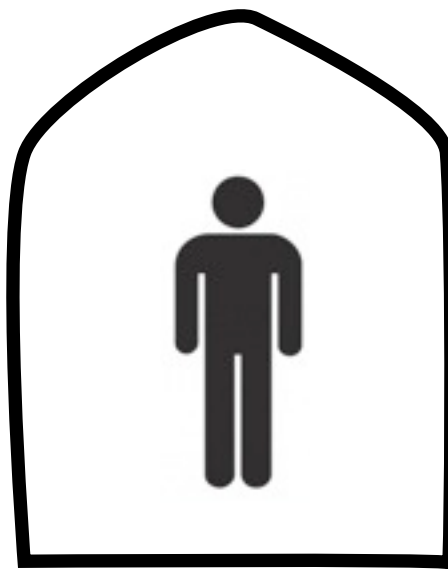

35kg de PdT

40kg de viande

Eau: 60m³

dont 20m³ d'eau chaude

Electricité: 1200kWh

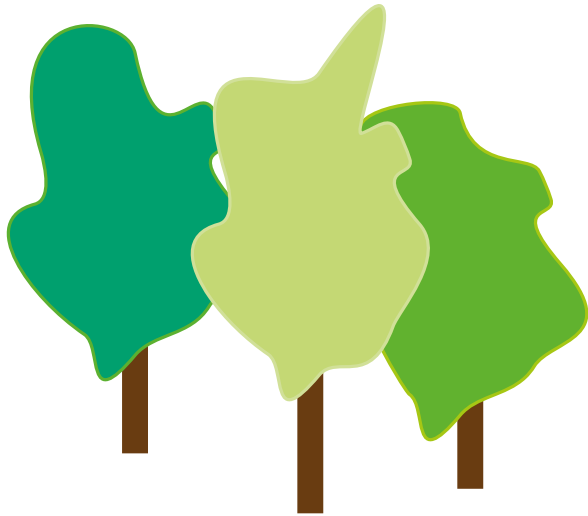

Déchets: 350kg

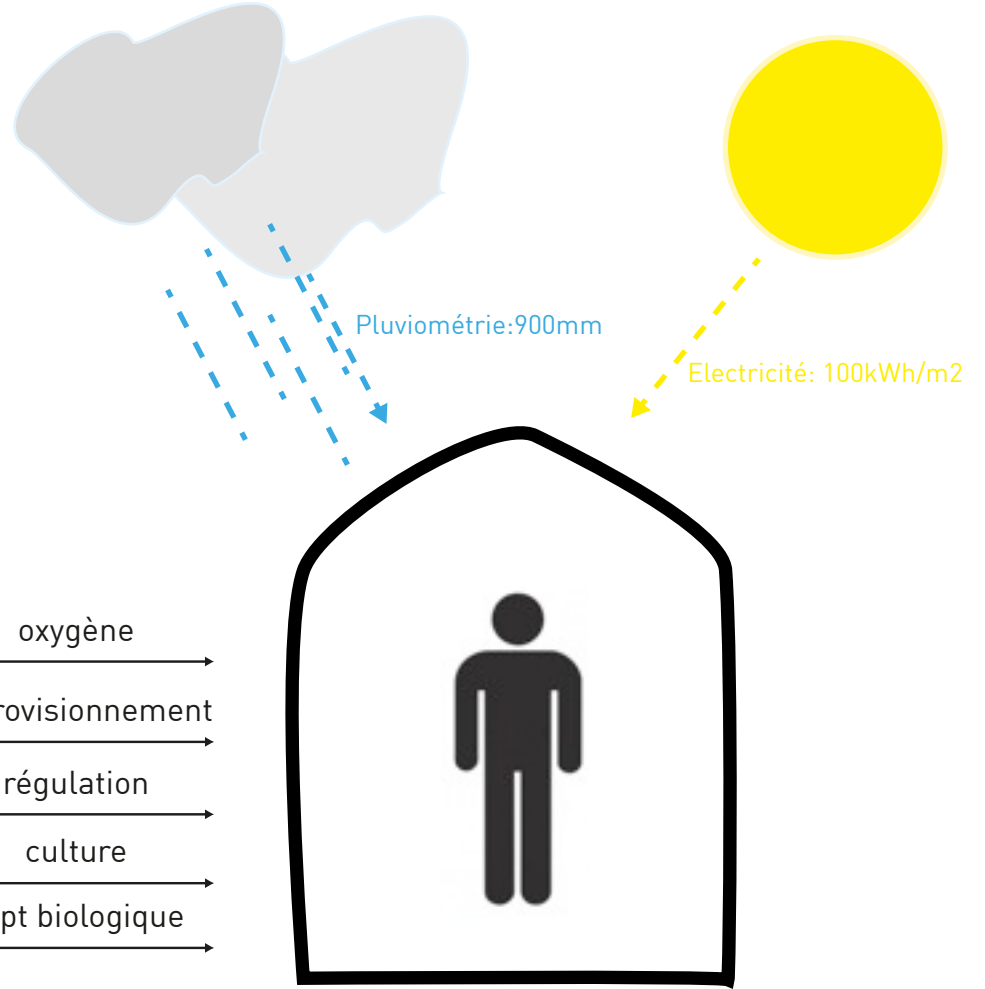

dont 20kg de gaspillage

Excréments: 70kg

Ecosystème

- oxygène →
- approvisionnement →
- régulation →
- culture →
- dvpt biologique →

Le logement comme écosystème.

**Etablir un écosystème à l'échelle de la ville,
entre productivité et pédagogie.**
